

WE'RE HIRING!

Excel/VBA Developer

Galle/Colombo, Sri Lanka
Full-time

About Enactor

Enactor is a successful and growing software company providing enterprise systems to leading UK, North American and European retailers. Enactor systems drive the instore, mobile and online channels that make up a modern retail organisation. With the expansion of our Sri Lankan office, we are looking for an energetic, dynamic and passionate individual to join our team.

Profile

Our innovative and growing company is looking for an Excel/VBA developer. This role will be instrumental in developing and introducing a new set of components to the Enactor Solution. These Excel components will provide effective, user friendly data capture, management and reporting facilities, operating as part of the overall Retail Management application.

Responsibilities

- Design and Develop Excel-based solutions for data entry and presentation, that provide user friendly, secure, well controlled functionality
- Develop automated and reusable VBA routines for validating user input and transforming data into structures suitable for submission to the Enactor platform.
- Develop Excel Interactions with the Enactor REST API framework for master data download, document submission etc.
- Support the Enactor BI Team with using Excel as one of the front-end tools for consuming Enactor Business Intelligence capabilities
- Understand, evaluate, and document business requirements
- Translate business requirements into specific solutions
- Produce technical documentation, test scripts and test cases from requirements
- Develop robust spreadsheet models with clearly defined inputs, calculations, and final output
- Provide documentation including data flow mapping, how-to guides and training materials for new and existing spreadsheet models

enactor

- Complete all tasks accurately and in a timely manner
- Build and maintain strong internal relationships across multiple teams / departments
- Analyse client / internal team requirements and provide smart, automated solutions that will make processes more accurate and efficient by reducing manual errors
- Review with the manager/team leader to prioritise solution requirements

Qualification & Experience

- Proven background on Design and Development of MS Excel VBA solutions
- Proven background completing projects under aggressive financial and time constraints
- Experience of delivering high-quality, well designed and controlled Excel documents appropriate for use by a wide range of users
- Experience of integrating Excel spreadsheet with external applications via REST APIs
- Willing to learn and self-teach any new technologies
- At least 3 years of Excel/VBA development experience

Other Key Skills

- Excellent Word, Excel, Visio, and PowerPoint skills
- Accustomed to working in a fast-paced market environment
- Ability to recognize and solve problems efficiently and work effectively with a small team
- Ability to work independently and take responsibility for managing workload and delivery

If you think you have the right attitude and skills to take on the above role with Enactor, please email your CV to sl-careers@enactor.co.uk at your earliest. We are looking to schedule interviews in the next few weeks.
