## Management Accountant

### Job Profile

We are seeking a highly capable management accountant to optimize our financial management policies. You will be performing financial analysis, preparing financial forecasts and advising senior management on strategic planning.

To ensure success as a management accountant, you should exhibit extensive knowledge of financial analysis, forecasting and experience in a similar environment. An outstanding management accountant will be someone whose financial accounting and business management expertise translates into sustained business growth.

### Key Responsibilities

- Gathering and interpreting information to evaluate the efficiency of financial procedures.
- Analyzing key financial data and advising senior management on strategic planning.
- Developing and implementing cost-effective financial policies and procedures, as well as mitigating financial risks.
- Preparing financial reports and budgets related to materials and stock-holding, as well as controlling and forecasting income and expenditure.
- Dealing with service costing, margin analysis and development of an efficient cost control system.
- Strategically roll out the company KPI and achieve the cost optimization targets.
- Strong experience in stock control.
- Provide the leadership and supervision to the in-factory finance team and in-store teams, as well as overseeing accounting procedures and supervising junior financial department staff

### Job Requirement

- Candidate should be finalist or partly qualified in CA/ CIMA/ ACCA
- Minimum 3 years of experience in manufacturing sector.
- Holding an accounting or similar degree from a recognized University is necessary
- Proficiency in business management and accounting software, such as Zoho Books, NetSuite, QuickBooks, etc.
- Age below 35 years of age.
- Excellent analytical, problem solving and organizational skills.
- Superb leadership, organizational, and problem-solving skills.
- Excellent collaboration and communication abilities.
