

Opportunity in IOT Development..

XcelaIT is a new Tech start-up in the field of Industrial automation established in partnership with Trioem Pvt Ltd focussed on providing Industry 4.0 solutions for multiple sectors using cutting-edge technologies in the field of IIOT, AI, and ML.

We are looking for software developers, Tech leads, and architects who have a passion for IIOT with prior experience in Azure IOT hub and related services stack. Fulltime, contract basis, and part-time assignments with a flexible working environment and attractive package await you.

Responsibilities:

- Design and develop IIOT solutions using C#, ASP.NET (Core), Power BI
- Integrate various IIOT devices to the Azure IoT hub and the software backend using Azure-recommended architecture and techniques.
- Ensure scalability, functional excellence, and security in the end-to-end solution.
- Execute and effectively manage the Implementation methodology in line with the SDLC/Agile.
- Evaluate requirements and provide the best possible solutions.
- Manage own work related to a project plan and milestones.
- Communication/workshop/presentations with clients to meet the customer's expectations.
- Provide post-implementation support as per SLA.

Qualification & Experience:

- Suitable Bachelor's Degree or Diploma i.e. Information Technology or related area of study.
- 3 + years' experience with software design and development in Microsoft tech stack.
- Experience in SQL Server, NO SQL, CosmosDB, Power BI
- Experience in ASP.Net, C#, and JavaScript.
