

WE'RE HIRING!

Data Operators

We are a dynamic start-up specializing in providing exceptional services to our esteemed global clientele. We are seeking motivated and detail-oriented Data Operators to join our team and play a crucial role in maintaining the quality and accuracy of our data-driven operations.

Key Responsibilities:

- **Data Accuracy Champion:** Be the guardian of accurate and high-quality data. Your attention to detail and dedication will help us maintain the data backbone of our operations
- **Spotting Trends:** Analyzing data isn't just a task; it's a chance to uncover trends and insights that drive strategic decisions. Your analytical skills will be your compass on this journey
- **Data Archivist:** Play a vital role in maintaining an organized data archive. Your systematic approach will ensure that our team can access crucial information effortlessly
- **Quality Checker:** Reviewing data for deficiencies or errors, correcting any incompatibilities, and checking output

Requirements:

- Partial completion of a Bachelor's degree in marketing, business, or a related field, or a professional qualification such as CIM
- We also welcome applications from school leavers interested in a Junior Associate position
- 1+ years of experience in marketing
- A good command of the English language, and interpersonal skills
- A good understanding of LinkedIn is an advantage
- Excellent organizational and time-management skills, with the ability to prioritize tasks effectively

 **Rajagiriya, Sri Lanka**
